FACT SHEET – CORRECTING MYTHS ABOUT SCHOOL CHAPLAINCY

When people pause to examine what chaplains actually do in schools, they find a service that supports the particular needs of the school community, and enhances both school culture and the efforts of other care professionals – at a low cost, and achieving significant social outcomes:¹

1. Almost 175,000 support programs, for over 1.2 million participants nationally every year, including:
   - More than 80,000 sessions supporting social, emotional and spiritual wellbeing, with more than 560,000 participants, including 230 funerals and memorial services.
   - Almost 50,000 educational support programs, involving over 475,000 participants, including more than 31,000 free breakfast programs.
   - Almost 15,000 extra-curricular activities in which chaplains are involved.

2. More than 420,000 preventative and responsive formal pastoral care conversations with students every year, including conversations involving:
   - Friendship / peer concerns (141,100)
   - School behavior (74,300)
   - Mental health (many of which are referred on to therapeutic counselling services – ensuring students receive the care they need, but might otherwise not find) (69,800)
   - Bullying and harassment (67,500)
   - Family breakdown / parental separation (67,300)

3. More than 230,000 formal pastoral care conversations every year (54% of total formal pastoral care conversations) across Australia with students in the following categories:
   - Disabilities (72,800)
   - Indigenous (65,500)
   - In state care (42,520)
   - Culturally diverse (29,160)
   - Refugees (6000)
   - Juvenile justice (5,800)

Here are some myths and misconceptions about school chaplaincy, and the actual reality:

<table>
<thead>
<tr>
<th>Myth / Misconception</th>
<th>Reality</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Chaplains are unqualified counsellors</td>
<td>That assertion is wrong. Chaplains perform pastoral care, not counselling. This involves:</td>
</tr>
<tr>
<td></td>
<td>• engaging students with structured programs (e.g. to build self-confidence, help with self esteem, develop skills in peer and other relationships, manage life transitions, work through grief and loss and family breakdown), and</td>
</tr>
<tr>
<td></td>
<td>• pastoral care conversations to build resilience and connect students with support networks.</td>
</tr>
</tbody>
</table>

¹ Each of the figures in paragraphs 1-3 represent the outcomes for NSCA-affiliated chaplaincies (in approximately 2000 of the 3000 schools funded by the NSCP), for which we have data – so the total outcomes of the program in 3000 schools reasonably would be even greater than these figures.
Myth / Misconception | Reality
--- | ---
These activities seek to promote positive wellbeing, prevent negative wellbeing factors and ensure students are referred appropriately to others where therapeutic intervention is needed – the ‘PPEI’ model (Promotion, Prevention, and Early Intervention):\(^2\)

b) NSCP does more harm than good | That assertion is wrong.

In fact the evidence is overwhelming that school chaplaincy is strongly positive for schools – in wellbeing and educational terms – as shown by those who know schools and students best:\(^3\)

- School staff (42%), the students themselves (26%) and their parents/carers (17%) are the largest sources of referral of a student to a school chaplain. Those closest to the students (and the students themselves) are the ones creating 85% of the demand for school chaplaincy services.

- Those interactions result in thousands of referrals to other sources of professional support – including guidance officers, counsellors and psychologists. Chaplains are required to be trained in identifying mental health issues and referring appropriately.

In this way, many students who might otherwise not seek the help they need can find the support of a chaplain, as well as referral to sources of therapeutic care.

<table>
<thead>
<tr>
<th>Myth / Misconception</th>
<th>Reality</th>
</tr>
</thead>
<tbody>
<tr>
<td>This is hardly surprising, given that <em>all</em> chaplains are trained in how to identify mental health issues and refer appropriately. ⁴</td>
<td></td>
</tr>
<tr>
<td>c) Chaplains are untrained</td>
<td>That assertion is wrong.</td>
</tr>
<tr>
<td>The mandated minimum standard qualification is a Certificate IV in youth work, community work or equivalent. All school chaplains meet that standard and 77% of NSCA affiliated chaplains exceed the mandatory educational standard.</td>
<td></td>
</tr>
<tr>
<td>d) Educationalists and psychologists reject the chaplaincy program</td>
<td>This assertion is wrong – at least for those who have studied the school chaplaincy program.</td>
</tr>
</tbody>
</table>
| For example, a 30 month longitudinal study completed in 2012 by the Research Centre for Vulnerable Children and Families demonstrated (among other outcomes): ⁵ | • the social and emotional support provided by school chaplains to students has a considerable positive impact;  
  • school chaplains help to build up students’ confidence to a considerable extent;  
  • the programs that the school chaplains run helps to develop students’ self-esteem;  
  • students from culturally and linguistically diverse communities are assisted by their chaplains; and  
  • students experiencing grief and loss or facing relationship difficulties are helped by their chaplain. |
| e) Federal money would be better spent on qualified youth workers | Chaplains ARE qualified in youth work, community work and equivalent areas of training.                                                                                                                                                                                                                                                                                                           |
| The program achieves significant outcomes, with a proven record over 11 years, and at a very modest cost to government:  
  • almost 175,000 support programs delivered each year, for over 1.2 million participants nationally;  
  • more than 420,000 preventative and responsive formal pastoral care conversations with students every year; and  
  • a committed workforce of around 2000 trained pastoral care workers (66% in rural or remote communities, and 58% of the chaplains are women) |                                                                                                                                                                                                                                                                                                                                                                                                    |

⁵ Harries, Cant, Lavery, Philips and Di Risio, *Evaluation of YouthCARE Chaplaincy Service in Western Australia* (University of Western Australia, 2012) ch 4. The study reinforced the 98% acceptance rate by school principals of an earlier 2009 study. The 2012 study looked at a wide group of stakeholders including school principals, teachers, parents (including regional indigenous parents), students, psychologists and professional associations such as primary and secondary school associations, and Parents and Citizens Associations.
## Myth / Misconception vs. Reality

<table>
<thead>
<tr>
<th>Myth / Misconception</th>
<th>Reality</th>
</tr>
</thead>
<tbody>
<tr>
<td>involved in promotion, prevention and early intervention activities for youth - and all of them trained in how to identify mental health issues and to refer appropriately.</td>
<td>Those outcomes are delivered at a cost to the federal government of approximately $1.55 per child per week.</td>
</tr>
<tr>
<td>The NSCP also represents a significant social return on government investment. We have calculated that for every $1 of federal funding, $2.38 of value is delivered in schools, through the uplift of donations, volunteer hours, school support and in-kind assistance.</td>
<td></td>
</tr>
<tr>
<td>f) The High Court twice ruled chaplaincy as invalid</td>
<td>The two High Court cases concerned now-superseded funding models. The Commonwealth has used a valid funding model since 2014.</td>
</tr>
<tr>
<td>g) The High Court declared school chaplaincy is no value to children</td>
<td>That assertion is wrong.</td>
</tr>
<tr>
<td>In any case, in 2012 the High Court was unanimous (7:0) in finding that the school chaplaincy program is not invalid under the establishment clause (s.116) of the Australian constitution.⁶</td>
<td></td>
</tr>
<tr>
<td>h) Schools should be secular. Religion has no place and should be left between consenting adults in the privacy of their home</td>
<td>Students should be free to explore spirituality for themselves. Denying this to students is contrary to: liberal thinking on free discourse; the human right of freedom of thought, conscience and belief; and the Melbourne Declaration on Australian Educational goals.⁸</td>
</tr>
<tr>
<td></td>
<td>In a free society, why should this one subject be excluded from schools – particularly when it plays such a positive protective role in wellbeing (including in secular literature)?⁹</td>
</tr>

FACT SHEET – CORRECTING MYTHS ABOUT SCHOOL CHAPLAINCY

Myth / Misconception | Reality
--- | ---
i) Secular roles are the neutral option in schools | That assertion is wrong, as the European Court of Human Rights has found:
‘Neutrality requires a pluralist approach on the part of the State, not a secularist one. It encourages respect for all world views rather than a preference for one. ... A preference for secularism over alternative world views – whether religious, philosophical or otherwise--is not a neutral option.’
School chaplaincy is based on this approach, consistent with Australia’s multicultural and plural nature.
j) Having religious chaplaincy is discriminatory against students who do not have a religious faith | Chaplains offer support to students regardless of whether or not they have a religious faith. However, because chaplains have a personal faith connection, they are able to better relate to and support students who come from a personal or cultural faith background – which is still more than 70% of the population.
k) Chaplains can’t convert students, so there’s no point in a religious chaplaincy program – secular workers should be used | It is entirely appropriate that chaplains cannot proselytise, and must respect the views of all students (whether religious or not).
However, a key distinctive of the program is that the role expressly supports the social, emotional AND spiritual wellbeing of students. Chaplains do not define that spirituality for students, but work with them to develop a positive spirituality, taking account of the student’s own cultural, family and religious (if any) background.
A secular program would lack that spiritual dimension – and would not work with the student’s own cultural, family and religious (if any) background - yet spirituality is a key element in wellbeing. No other role in schools fills that space.
The chaplaincy program is a proven tool for the federal government to meet the spiritual development objectives of the Melbourne Declaration on Australian Educational goals.

(2010) 30(2) Clinical Psychology Review 145-154. See the set of protective factors (which include ‘moral beliefs’ and ‘participation in a church or other community group’) and risk factors in Commonwealth Department of Health and Aged Care, Promotion, Prevention and Early Intervention for Mental Health – A Monograph (Commonwealth Department of Health and Aged Care, 2000) 15-16.
2017 NATIONAL SCHOOL CHAPLAINCY SNAPSHOT

QUICK FACTS

1,562 CHAPLAINS working in 1929 schools

Gender

58% Female 42% Male

The average number of work days is 3

Average age 45 years

QUALIFICATIONS

7% Masters
25% Bachelor
32% Diploma / Adv. Dip
15% Grad. Cert.
21% Cert. IV (minimum qualification)

of chaplains exceed the minimum qualification level of Cert. IV across Youth Work, Social Science, Education, Ministry/ Theology and other disciplines.

WHAT DO CHAPLAINS DO?

Social, emotional & spiritual support

Wellbeing outcomes

Educational outcomes

How chaplains spend their time:

- Social, emotional and spiritual support
- Role modelling and mentoring
- Educational support
- Extra-curricular activities
- Team contributions
- Community Development

School chaplains promote social, emotional and spiritual wellbeing through role modelling, mentoring, pastoral care, structured activities and programs.

ACARING PRESENCE

Every week chaplains have 28,264 informal conversations with students

Every week chaplains have an additional 17,867 informal conversations with parents/carers & school staff

Chaplains are uniquely placed to connect with students through quality time and significant conversations about everyday life.

As adult role models & mentors who built into the school system, chaplains become protective factors for the wellbeing of students.

Chaplains also provide a caring & supportive environment for both parents/carers and staff through personal conversations.
Formal pastoral conversations with particular student groups per week

Formal pastoral conversations with particular student groups per week

- Disability/special needs: 1,821
- Indigenous: 1,638
- In state care: 1,063
- Culturally diverse: 729
- LGBTI: 216
- Refugee: 151
- Juvenile justice: 146

5,582 meetings with school based support professionals including guidance officers, counsellors, special needs coordinators and many others.

EVERY WEEK chaplains have 13,461 formal conversations WITH STUDENTS

Outcomes

- Ongoing pastoral support from chaplain: 59%
- Development of action plan: 12%
- No further action required: 11%
- Professional referral: 9%
- Information given: 5%
- Advocacy: 5%
- Child protection reporting: 2%

Top 5 pastoral issues

1. Friendships / peer Issues: 3,528
2. School behaviour: 1,859
3. Mental health: 1,745
4. Bullying / harassment: 1,688
5. Family - breakdown / parental separation: 1,683

Program breakdown

- Social, emotional and spiritual support programs: 140,612 participants, 20,564 sessions
- Educational support programs: 119,510 participants, 12,167 sessions
- Role modelling and mentoring programs: 20,570 participants, 8,795 sessions
- Community development programs: 33,661 participants, 1,736 sessions

Chaplains make a significant contribution to the wellbeing of school communities through the facilitation of social, emotional and spiritual wellbeing programs and participation in extra-curricular activities.

Methodology

The 2017 National Chaplain Census took place during term 3, 2017 when 1184 chaplains took the survey with 940 completed. The data presented in this infographic has been extrapolated from the survey data to match the total number of chaplains (1562) in Australia working for organisations that are part of the National Schools Chaplaincy Association (NSCA) at the end of term 3.
